

ITS Wireless Ethernet Bridge Kits

Model Number: ITSETHSSKIT

DESCRIPTION:

These kits are used to provide remote ethernet connectivity to irrigation controllers in the field requiring ethernet connection for communication. Various brands of controllers utilizing this product include, but are not limited to, Rain Bird, Toro, Rain Master, Baseline, Hunter, and Calsense. These kits provide an inexpensive and simple solution to getting ethernet remotely out to the irrigation controllers in the field. In a typical application a box mounted unit would be installed on the building that is providing the actual ethernet cable and power. The location would be in line of site to the irrigation controller or controllers. The unit in the field can be placed inside the controller either on the included board or it can be removed easily if desired. The included shotglass antenna would be mount on the top of the controller or enclosure for the best radio reception.

FEATURES:

- 1 Receiver and 1 Transmitter
- 900mhz Radio Transmission Between Units
- Plug-in Power Supply for Both units
- All Units Include Shotglass Antenna's and Stick Antenna's
- Box Mounted Includes:
 - Weather Resistant Hinged Outdoor Box with Hasp and Key Lock
 - Electrical Junction Box for 120vac Hookup
 - Power Switch for Electrical Outlet
- Operational Distance of +/- 2,600 Feet
- LCD Indicator Lights
- Operation Speed 10mbps +/- Depending on Distance and Obstacles
- Additional Receivers Can Be Purchased Separately

MODELS:

- ITSETHSSKIT1: Includes 2 of the Plate Mounted Units (Receiver and Transmitter)
 ITSETHSSKIT2: Includes 1 Plate Mounted and 1 Box Mounted Unit (Receiver and Transmitter)
 ITSETHSSKIT3: Includes 2 of the Box Mounted Units (Receiver and Transmitter)
 ITSETHSSRCVR: One Add-On Receiver on a Plate for Application with Multiple Receivers
