

ITS Rain Bird® Adapter Box for Calsense®

Model Number: ITS-ADP-BOX-CAL

DESCRIPTION:

This Imperial Technical Systems Adapter Box allows for the retrofitting of a Calsense project with stainless steel pedestals to the newer Rain Bird IQ controllers while maintaining a very professional looking installation. The box fits evenly on all sides and blends in beautifully with the existing pedestal base. It also comes with pre-installed gasket material to make for a water proof installation. The keylock on the door is a #751, and the unit also includes a replacement lock for the lower panel incase the user doesn't wish to use the existing large round padlock.

Utilizing the existing base rather than replacing and installing a completely new pedestal is both a huge material cost and labor saving to the project.

Complete step by step instructions are included with each box making the retrofitting seamless and easy.

FEATURES:

- Stainless Steel Adapter Box
- Weatherproof Gasket Material Included
- #751 Keylock with Additional Front Panel Lock
- Preset Metal Standoffs to Accept Rain Bird Controller Case
- Pre-Lasered Knockouts for Easy Wiring Access

DIMENSIONS:

Width: 14"
