

ITS Rain Bird® Adapter Box for Rain Bird® Square Pedestal

Model Number: ITS-ADP-BOX-RB

DESCRIPTION:

This Imperial Technical Systems Adapter Box allows for the retrofitting of an older style Rain Bird square pedestal with a new stainless steel topper to allow for easy retrofitting to the newer Rain Bird IQ controller line while maintaining a very professional looking installation. The box fits directly on top of the older style Rain Bird stainless steel square pedestal. It comes with pre-installed gasket material to make for a water proof installation. The keylock on the door is a #751, and the unit also includes a replacement front door, as shown in the photo, to eliminate the older style slide in door.

Utilizing the existing base rather than replacing and installing a completely new pedestal is both a huge material cost and labor saving to the project.

Complete step by step instructions are included with each box making the retrofitting seamless and easy.

FEATURES:

- Stainless Steel Adapter Box
- Weatherproof Gasket Material Included
- #751 Keylock with rubber Weather Cover
- Preset Metal Standoffs to Accept Rain Bird Controller Case
- Pre-Lasered Knockouts for Easy Wiring Access
- New Stainless Steel Front Door with #751 Keylock

DIMENSIONS:

Width: 14"
Height: 13"
Depth: 6"
