

## ITS Master Valve, Pump, and Flow Sensor Relay Kit

**Model Number: MVR/PSR/FSR**

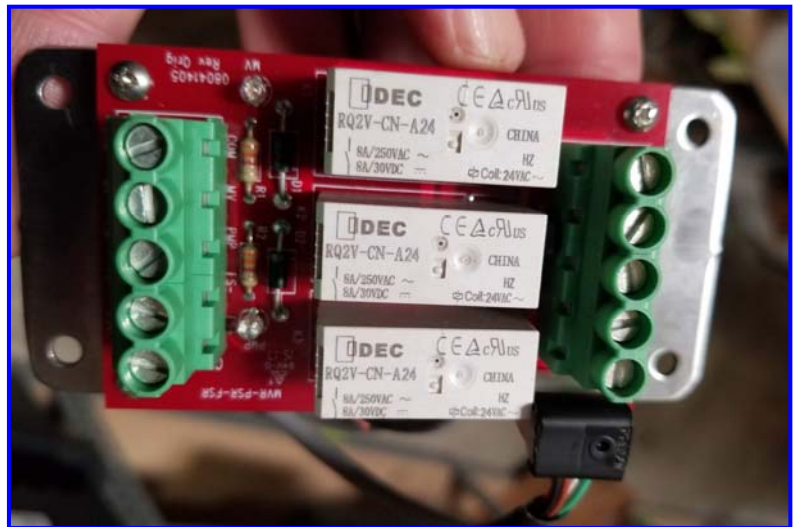

### DESCRIPTION:

This is the only fully independent relay kit on the market for irrigation controllers. Three separate relays allow complete independence of pump, master valve and flow sensor between multiple irrigation controllers. This relay kit can be used with either normally closed or normally open master valve situations. If there are more than two controllers in the wiring scenario then additional relays kits can be added to keep all controllers fully independent. No additional power source is required.

Complete instructions with diagrams are included to cover most typical irrigation wiring situations.

### FEATURES:

- Three Fully Independent Relays
- Labeled Terminal Blocks
- Normally Open or Normally Closed Circuits
- No Additional Power Source Required
- Easily Mounted Inside Controller
- Easily Mountable Packaging

### DIMENSIONS:

Width: 3 1/2"  
Height: 2"  
Depth: 1 1/2"
